

TaskManager::nextTask

TaskManager::previousTask

TaskManager::TaskManager

TaskManager::selectTask

```
graph LR; A[TaskManager::nextTask] --> D[TaskManager::selectTask]; B[TaskManager::previousTask] --> D; C[TaskManager::TaskManager] --> D;
```

The diagram illustrates three methods of the TaskManager class pointing to a single method, selectTask. The methods are arranged vertically on the left: nextTask, previousTask, and TaskManager. Arrows from each of these methods point to the selectTask method, which is highlighted in a gray box on the right.
